PROFILE SUMMARY

Final-year Software Engineering student at USM (completing July 2026, graduating November 2026) with production experience in full-stack development, cloud-native microservices, and scalable system architecture. Built and deployed multiple end-to-end applications spanning React, Node.js, Firebase, and Azure. Strong foundation in clean architecture, system design, and API integration. Available August 2026.

PROFESSIONAL EXPERIENCE

Robotic Process Automation Intern

March 2025 – September 2025

TP Malaysia (Teleperformance), Penang

- Designed and deployed 10+ production automation systems across HR, Finance, and Operations, integrating 4+ enterprise platforms via REST APIs with event-driven pipelines serving business teams daily.
- Engineered a multilingual NLP recruitment voice bot (Yellow.ai) with intent and entity mapping, conditional branching, and live database calls, handling candidate screening across 3 languages.
- Built Payroll Alert Bot (Power Automate + SQL + Outlook API), generating dynamic HTML reports from filtered datasets, eliminating 100% of manual report distribution.
- Delivered Article Scraping Bot, Badge Printing Bot (Python image processing), Country Code Bot, and modular CSV Automation Suite for sanity checks and SharePoint uploads.
- Led full automation lifecycle: requirement gathering, solution design, build, testing, deployment, documentation, and stakeholder adoption, working directly with the Chief of Staff.

RPA Intern

June 2023 – July 2023

KG Information Systems Sdn Bhd (KGiSL), Kuala Lumpur

- Built Verify Account Positions Bot (UiPath) for automated financial reconciliation between ACME systems, reducing manual workload by 60% and minimizing human error in financial reporting.
- Developed Student Data Management Bot automating report generation and email distribution across departments, cutting processing time by 50% and improving data accuracy.
- Delivered Expense Approval Bot automating reimbursement validation, multi-level approval workflows, and real-time status tracking for finance teams.

EDUCATION

Bachelor of Software Engineering with Honours

2023 – Present (Expected July 2026)

- Universiti Sains Malaysia, Penang
- CGPA: 3.47 / 4.0 | Dean's List – Semesters 3 & 5

Diploma in Computer Science (Internet Computing)

2021 – 2023

- Sultan Idris Education University, Perak
- CGPA: 3.89 / 4.0 | Dean's List – All Semesters | MUET Band 4

PROJECTS

StopBully360 | AI-Based Bullying Reporting & Case Management System

Oct 2025 – May 2026

- Architected an event-driven, production-grade platform for 5 concurrent user roles with real-time case tracking, secure messaging, appointment scheduling, and full audit trails built on Firebase Firestore and Cloud Functions with sub-second state synchronisation.
- Built a Google Gemini LLM pipeline for automated incident classification, severity scoring, emotion analysis, and AI case summaries, cutting manual triaging effort by ~60% and accelerating crisis intervention.

- Developed Ally AI Chatbot with multi-intent classification, risk assessment logic, and automated escalation alerts for high-severity cases with full RBAC and role-scoped data access enforcement.
- Delivered compliance-grade analytics dashboards with PDF and Excel export pipelines for school administration reporting and case documentation.

Stack: React, TypeScript, Node.js, Firebase, Google Gemini AI, Tailwind CSS, Recharts, jsPDF, ExcelJS

Customer Success Guardian & Employee Assistant | Hackathon

March 2026

- Built two enterprise-grade AI agent apps automating warranty checks, technician dispatch, intelligent ticketing, leave requests, and meeting room booking.
- Applied microservices architecture with OpenAPI tool integration and deterministic function-calling for governance-compliant AI responses.

Stack: Azure OpenAI, Azure Cosmos DB, Microsoft AI Foundry, Node.js, Express, OpenAPI, Microservices

AuraBeat | Personalized Music Streaming Web Application

April 2026

- Built a full-featured music streaming web app with JioSaavn API integration, supporting real-time search, multi-language filtering, and dynamic playlist management across songs, artists, albums, and playlists.
- Integrated global audio state management with Zustand, covering live playback control, queue orchestration, playback history, and liked songs persistence across sessions.

Stack: React, Tailwind CSS, Zustand, React Router, JioSaavn API

SKILLS

RPA & Automation	Power Automate, UiPath, Power Apps, AI Builder OCR, N8N, Yellow.ai, SharePoint Automation
AI & Chatbots	Azure OpenAI, Google Gemini AI, Microsoft AI Foundry, NLP, Conversational AI, Intent Mapping, Prompt Engineering
Integration	REST API, OpenAPI, Outlook API, SQL Automation, Azure Cosmos DB, Firebase, Regex Parsing, Power BI, Tableau, SQL
Frontend & Backend	React, TypeScript, Next.js, Node.js, Express.js, JavaScript, Python, Java, PHP, Laravel, SQL, VB.NET

ACHIEVEMENTS & CERTIFICATIONS

- Top 7 Finalist | Chin Hin AI Hackathon, National Level (March 2026)
- Microsoft Certified: Azure AI Fundamentals (2024)
- React JS Bootcamp Certification | Novitech R&D Limited (2024)
- Machine Learning with Python for Manufacturing & Supply Chain (2025)
- Power BI Data Analyst Associate | Microsoft (2023)
- Artificial Intelligence Internship Certificate | Novitech R&D Limited (2024)
- Gold Award | National Level Mobile App Developing Contest (2020)
- Gold Award | Singapore & Asian Schools Math Olympiad – SASMO (2019)

LEADERSHIP & ACTIVITIES

- | | |
|--|----------------|
| • Program Director Use Twice Save Globe National Programme | UPSI 2022 |
| • Vice Treasurer First Foot Forward International Programme | UPSI 2022 |
| • Bureau Member (REXCO) Entrepreneurship & Sponsorship Kelab Kebudayaan Bharatanatyam | UPSI 2021/2022 |
| • Secretariat CONVEX 2023 | USM 2023 |
