PROFILE SUMMARY

Software Engineering graduate from Universiti Sains Malaysia with hands-on production experience building full-stack, cloud-native applications and applying AI to real systems. Delivered end-to-end projects, from system design and API integration through testing and deployment, with a strong foundation in clean architecture and scalable engineering practices.

PROFESSIONAL EXPERIENCE

Robotic Process Automation Intern

March 2025 – October 2025

TP Malaysia (Teleperformance), Penang

- Recognized with USM's Industrial Training Excellence Award for outstanding performance during the internship.
- Designed and deployed 10+ production automation workflows across HR, Finance, and Operations, integrating 4+ enterprise platforms via REST APIs with event-driven pipelines serving business teams daily.
- Built a multilingual NLP recruitment voice bot (Yellow.ai) with intent and entity mapping, conditional branching, and live database calls, handling candidate screening across 3 languages.
- Built a Payroll Alert Bot (Power Automate, SQL, Outlook API) generating dynamic HTML reports from filtered datasets, eliminating manual report distribution entirely.
- Delivered Article Scraping Bot, Badge Printing Bot (Python image processing), Country Code Bot, and modular CSV Automation Suite for sanity checks and SharePoint uploads.
- Led full automation lifecycle: requirement gathering, solution design, build, testing, deployment, documentation, and stakeholder adoption, working directly with the Chief of Staff.

RPA Intern

June 2023 – July 2023

KG Information Systems Sdn Bhd (KGiSL), Kuala Lumpur

- Built Verify Account Positions Bot (UiPath) for automated financial reconciliation between ACME systems, reducing manual workload by 60% and minimizing human error in financial reporting.
- Developed a Student Data Management Bot automating report generation and email distribution across departments, significantly cutting processing time and improving data accuracy.
- Delivered an Expense Approval Bot automating reimbursement validation, multi-level approval workflows, and real-time status tracking for finance teams.

EDUCATION

Bachelor of Software Engineering with Honours

2023 – 2026

- Universiti Sains Malaysia, Penang
- CGPA: 3.49 / 4.0 | Dean's List - Semesters 3,5 and 6

Diploma in Computer Science (Internet Computing)

2021 – 2023

- Sultan Idris Education University, Perak
- CGPA: 3.89 / 4.0 | Dean's List - All Semesters | MUET Band 4

PROJECTS

StopBully360 | AI-Based Bullying Reporting & Case Management System

Oct 2025 – May 2026

- Architected an event-driven, production-grade platform for 5 concurrent user roles with real-time case tracking, secure messaging, appointment scheduling, and full audit trails built on Firebase Firestore and Cloud Functions with sub-second state synchronization.
- Built a Google Gemini LLM pipeline for automated incident classification, severity scoring, emotion analysis, and AI case summaries, cutting manual triaging effort by and accelerating crisis intervention.

- Developed Ally AI Chatbot with multi-intent classification, risk assessment logic, and automated escalation alerts for high-severity cases with full RBAC and role-scoped data access enforcement.
- Delivered compliance-grade analytics dashboards with PDF and Excel export pipelines for school administration reporting and case documentation.

Stack: React, TypeScript, Node.js, Firebase, Google Gemini AI, Tailwind CSS, Recharts, jsPDF, ExcelJS

Customer Success Guardian & Employee Assistant | Hackathon

March 2026

- Built two enterprise-grade AI agent apps automating warranty checks, technician dispatch, intelligent ticketing, leave requests, and meeting room booking.
- Applied microservices architecture with OpenAPI tool integration and deterministic function-calling for governance-compliant AI responses.

Stack: Azure OpenAI, Azure Cosmos DB, Microsoft AI Foundry, Node.js, Express, OpenAPI, Microservices

AuraBeat | Personalized Music Streaming Web Application

April 2026

- Built a full-featured music streaming web app with JioSaavn API integration, supporting real-time search, multi-language filtering, and dynamic playlist management across songs, artists, albums, and playlists.
- Integrated global audio state management with Zustand, covering live playback control, queue orchestration, playback history, and liked songs persistence across sessions.

Stack: React, Tailwind CSS, Zustand, React Router, JioSaavn API

SKILLS

AI & Automation	Power Automate, UiPath, Power Apps, N8N, Yellow.ai, OpenAI, Microsoft AI Foundry, Google Gemini AI, NLP, Prompt Engineering, FacePager
Cloud, Data & Integration	REST API, OpenAPI, Azure Cosmos DB, Firebase, Supabase, Microsoft SQL Server, Oracle DB, phpMyAdmin, Power BI, Tableau
Languages	JavaScript, TypeScript, Python, Java, C++, C#, PHP, SQL, R
Frameworks & Tools	React, Next.js, Node.js, Express.js, Laravel, Tailwind CSS, Jira, Git/Github, Postman

ACHIEVEMENTS & CERTIFICATIONS

- AWS Certified: AI Practitioner | Amazon Web Services (July 2026)
- Top 7 Finalist | Chin Hin AI Hackathon, National Level (March 2026)
- Machine Learning with Python for Manufacturing & Supply Chain (2025)
- Microsoft Certified: Azure AI Fundamentals (2024)
- React JS Bootcamp Certification | Novitech R&D Limited (2024)
- Artificial Intelligence Internship Certificate | Novitech R&D Limited (2024)
- Power BI Data Analyst Associate | Microsoft (2023)
- Gold Award | National Level Mobile App Developing Contest (2020)
- Gold Award | Singapore & Asian Schools Math Olympiad – SASMO (2019)

LEADERSHIP & ACTIVITIES

• Secretariat CONVEX 2023	USM 2023
• Program Director Use Twice Save Globe National Programme	UPSI 2022
• Vice Treasurer First Foot Forward International Programme	UPSI 2022
• REXCO Entrepreneurship & Sponsorship Kelab Kebudayaan Bharatanatyam	UPSI 2021/2022
